

CLAWED'S LAWS OVERVIEW

Everything You
Wanted to Know!

Our travels, we always look for great ideas - completely new ones or sometimes just simple ways to improve your experience at the Chowder House. One that hit us from a couple different places at the same time, led to what we call "Clawed's Laws" and is being introduced this month.

An east coast (mainly northeast) chain called "Ninety Nine" and a San Francisco Bay area group called "Max's," sparked us to create "Clawed's Laws." Please don't view them as

legalistically! That is not

our intent. Some are claims, others promises, with a few cute, positive expressions thrown in. Our entire Staff broke into teams to work on this with the top three "Laws" garnering cash awards of \$50 each for winning team's members.

Excitement and high participation abounded;

we were amazed—about 125 submissions! Our management team applauds everybody's efforts as we present a few of our favorites here. Watch for others to surface in future issues of the *Marblehead Messenger* and around the Chowder House. Designed for your reading and commenting pleasure, digest them and enjoy!
